MORE FOOD FOR BRAIN OF GERMAN

Roosevelt Gives Sharp Talk on Monroe Doctrine.

URGES USE OF BACKBONE

Declares United States Must Make Good Her Word.

MAKE NO IDLE BOAST

But Treat Nations With Dignified Courtesy His Idea.

East Northfield, Mass., Sept. 1.—President Roosevelt today concluded his tour through Vermont at Brattleboro, and is spending the night here at Northfield. The president began the day's journey at Burlington, reaching that city from Shelburne, the home of Dr. W. Edward Webb. After a drive about the city the presidential train started southward, stops being made at Vergennes, Middlebury, Brandon, Proctor, Rutland, Ludlow, Bellows Falls, Chester and Brattleboro, and his Vermont trip was ended. He crossed into Massachusetts in the early evening, and went to Northfield, to remain tonight as the guest of William H. Moody, son of the noted evangelist. The president will go to Round Top in the morning to visit Mr. Moody's grave.

The president spoke at every stop today, but most of his addresses were brief. That of the greatest import was one delivered at Proctor, the home of Senator Proctor, wherein he defined his idea of the Monroe doctrine.

PROCTOR'S PREDICTION
Senator Proctor introduced the president saying:

"Neighbors and friends, for the third time a president of the United States honors us with his presence and he will speak from this platform. I do not expect to have the honor and the pleasure of introducing another president, but I do expect to have the pleasure of introducing this one, for four years hence when he is serving his second term (loud applause)."

MEANING OF DOCTRINE
After thanking the people for their greeting the president said:

"We believe in the Monroe doctrine, not as a means of aggression at all. It does not mean that we are aggressive toward any power. It means merely that as the greatest power on this continent we remain steadfastly true to the principles first formulated under the presidency of Monroe, through John Quincy Adams—the principle that this continent must not be treated as a subject for political colonization by any European power. As I say, this is not an aggressive doctrine. It is a doctrine of peace. A doctrine of defense, a doctrine to secure the peace of this continent for the United States here to develop peaceably along their own lines. Now we have formulated that doctrine. If our formulation consists simply of statements on the stump or on paper, they are not worth the breath that utters them, or the paper on which they are written. Remember that the Monroe doctrine will be respected as long as we have a first-class efficient navy and not very much longer."

CONTEMPTIBLE CREATURE
"In private life he who asserts something says what he is going to do and does not back it up is always a contemptible creature and as a nation the last thing we can afford to do is to take a position which we do not intend to make good. It is a contemptible creature in private life as almost always the strong does not need to have his position of a weak man and a nation that he men boasts or brags on the account."

NOT TOO FRIENDLY
"Least of all does a self-respecting nation wish its public representative to threaten or menace or insult another power. Our attitude toward all powers must be one of such dignified courtesy and respect as we intend that they shall show us in return. We must be willing to give the friendly regard that we exact from them. We must not more wrong them than we must submit to wrong done by them, but when we take a position let us remember that our holding it depends upon ourselves, depends upon our showing that we have the ability to hold it."

After speaking of the part Vermont has played in the country's history, through Admiral Dewey and Clark, the president continued:

"Shame to us if we assert the Monroe doctrine and if our assertion shall be called in question, show that we have only made an idle boast, that we are not prepared to back up our words by deeds." (Loud applause.)

WILL NOT EXCLUDE CHINESE
Taft Declares They're Necessary in Philippines and He's Chief.

Washington, Sept. 1.—It is the opinion of the war department that Governor Taft's remarks at the board of trade banquet in Manila yesterday, respecting the employment of labor on plantations will form the basis of a suggestion to Congress, at the next session, that the act extending the Chinese exclusion laws to the Philippines be amended. It is contemplated to remove the iron-clad restriction with power to regulate the entrance of Chinese labor. The commission there already has given some attention to this subject and it is believed that Professor Jenks' investigation into the labor problem in the Straits Settlements and elsewhere in the Orient must be given its approval. The proposed regulations, it is said, will look to a wisely regulated system of admissions of Chinese as plantation laborers under suitable bonds in such cases, under proper systems of licensing, and a condition that they shall forfeit of them. Such an "Hobbes" leave the Philippines after a certain period of time. Such regulations as exist in Hawaii for the proper care of the coolies would be incorporated.

Governor Taft's representations on this subject yesterday were in answer to pressing demands from the American chamber of commerce and employers of labor in the Philippines for relief from the present conditions which it is alleged prevent the development of the country.

HIGGINSON MAKES SCORE
Attacking Rushes and Captures Martha's Vineyard and Block Island.

Newport, R. I., Sept. 1.—Admiral Higginson did not make delay after the declaration of hostilities today to cut out work for the jacks and marines of his fleet, accomplishing by daylight, but under the cover of a fog, two things that General MacArthur's army had anticipated. These were the seizure of Martha's Vineyard and Block Island and the capture of the army's signal station at each place.

Woodsboro, Mass., Sept. 1.—The United States cruiser Olympia dashed into this port this forenoon, landed a force and seized all telegraph, telephone and cable stations, thereby cutting off all communication with Martha's Vineyard and Elizabeth Island.

Of course the seizure and destruction of telegraphic and cable facilities were figurative, and it required the decision of an umpire to make plain whether or not the points attempted by Admiral Higginson had been won. As the landing was made, the telegraph and telephone offices were entered by sufficient force to have destroyed the property, or at least the instruments, and at the same time a boat's crew had located the cables with grappling hooks and held them a sufficient period to have allowed for the cutting of them, there seemed to have been no question that the move had been entirely successful.

DUEL OVER GIRL'S GLANCES
Two Men in Colorado Shoot Each Other Down in Heated Passion.

Windsor, Colo., Sept. 1.—A revolver and a bullet to the death was fought here on Main street at 4 o'clock last evening and as a result Gus Spurgeon, aged 25, a Swedish miner was instantly killed, and a Swedish miner was shot through the left breast two inches above the heart and mortally wounded, and Chauncey Tennell, a bartender, was shot in the groin and perhaps fatally wounded.

By shooting the direct result of insane jealousy of Amoson over Amy Butta, a pretty 15-year-old girl living here with her married sister with whom he was desperately enamored. The girl did not reciprocate Amoson's feeling. Yesterday Amoson learned for the first time that Amy Maloy, a young miner had called at his home and had been seen in the girl's company. Amoson secured a rifle and went on a hunt for Maloy. He saw Maloy on the street and fired two shots at him, but neither reached its mark. Maloy escaped and during the remainder of the day kept under cover fearing Amoson would kill him if he appeared on the street. Last evening Gus Spurgeon, who was a friend of both Maloy and Amoson, met the latter on Main street and attempted to make peace between the two men.

Amoson became greatly excited and told Spurgeon in turn grew angry at Amoson's manner. High words followed and Amoson began to shoot with the above result.

Tromsø, Norway, Sept. 1.—The Baldwin-Ziegler supply ship Frithjof, which left here July 1 for Franz Josefland, was spoken August 5. She reported all was well on board and said she so far had not heard from her teaching Franz Josefland.

In a recent interview Mr. Ziegler explained that the Frithjof party would pass the winter at Franz Josefland and would make their expedition independent of the party of Mr. Baldwin. Continuing Mr. Ziegler said:

"The Frithjof reaches Camp Zeigler all right and the new expedition starts next spring. Baldwin will receive orders to proceed to Camp Zeigler as soon as he can next summer. He will remain there through the winter and will go north to relieve the other expedition or to find the pole in the spring of 1904. If things turn out that way, Baldwin's expedition will be a relief expedition for the one that was carried on the Frithjof. Mr. Champ will bring the Frithjof back to Tromsø."

Gore, the blind orator from Comanche county, was present and addressed the convention. His mention of Bill Cross name failed to bring applause. ROOSEVELT DENIES REPORT
Says There's Nothing in Report of Knox's Succeeding Justice Shiras.

Fifty Bodies Already Have Been Washed Ashore.

TERRIFIC STORM BROKE

And Drove Eighteen Vessels in All Ashore.

Capetown, Sept. 1.—Eighteen vessels, mostly sailing craft, have been driven ashore in a gale at Port Elizabeth. Five of them were dashed to pieces and all the members of their crews were lost. Two tugs are also reported to have foundered and a score of lighters are ashore. It is feared that there has been great loss of life.

Sir John Gordon Spragg, the premier, said in the house of assembly this afternoon that he feared the loss of life from the gale would be enormous. The storm broke shortly before midnight last night and was accompanied by a deluge of rain and brilliant lightning. The night was very dark. Several tugs went out to the assistance of the endangered vessels, but nothing was visible from the shore at Port Elizabeth except the continual flashes of rockets as signals of distress.

Daylight revealed the beach at the north end of Algoa Bay strewn with vessels lying high and dry, while others were in the surf and being swept by the huge breakers. With the exception of four vessels which foundered with all hands, every single vessel in the roadstead was ashore by midday. Many steamers, after weathering the storm all night, steamed out to sea at daylight. Fifty bodies have already been washed ashore.

The British steamer Scott, belonging to the Union Steamship company, of Southampton, left Port Elizabeth Saturday for Cape Town. She was due here early this morning, but has not yet been sighted, so great anxiety is felt regarding her fate. The steamer Bertin, also belonging to the Union Steamship company, was blown ashore and narrowly escaped destruction.

The favorite in the betting, selling with Gall Hamilton for \$10,000, and the field for \$10,000. John Mc. and Gall Hamilton fought it out in a royal battle. It took six heats to settle the question of supremacy. The Pennsylvania horse being beaten by a nose in the final. Red Babe, from Marion, Ga., put up a spirited race, taking third place. This horse beat out John Mc. in the fifth under the whip, making the sixth heat necessary. In the 12th trot, Wilkes,

30 CRUSHED INTO A PULP

Excursion Train in Alabama Leaps Down Embankment.

ROLLS OVER AND OVER

And Is Smashed Into Splinters by the Fall.

DEAD ARE ALL NEGROES

Cries and Moans of Mangled Are Sickening.

Birmingham, Ala., Sept. 1.—While rounding a curve on a high embankment near Berry, Ala., this morning the engine and four cars of an excursion train on a branch of the Southern railway leaped from the track and rolled over and over, smashing the coaches and causing the instant death of thirty persons and the injury of eighty others. Physicians say at least twenty-nine of the injured cannot live.

With the exception of H. M. Dudley, trainmaster of the Southern railway, lying at Birmingham, and Moscoe Shelby, of Columbus, Miss., all of the dead and injured are negroes, who had taken advantage of excursion rates from points in Mississippi to Birmingham. All lived in Mississippi.

The train was running at a rate of thirty miles an hour. At a curve on top of a sixty-foot embankment the tender of the engine suddenly left the track, jerking the engine and the first four cars with it. There were ten cars in the excursion train, but the fourth broke loose from the fifth and with the heavy engine plunged down the steep incline.

The cars, which were packed with passengers, tumbled completely over several times and were crushed like egg shells, killing and crippling the inmates. Dead bodies were scattered in every direction and the moans and appeals for help from the wounded were sickening. Wrecking trains carrying physicians were hurried from Columbus, Miss., and Birmingham, and everything possible is being done to alleviate the sufferings of the injured. The dead bodies have been prepared for burial.

TURKS CLAIM INTEREST
Government Disclaims Disinclination to Investigate Miss Stone Affair.

Constantinople, Sunday, August 31.—The report circulated in the United States by a news agency saying that the Turkish government has addressed an abrupt note to United States Minister Leishman, saying that it absolutely refused to further discuss the case of Miss Ellen Stone, the American missionary, and a companion, in September, 1901, as the outrage was not committed on Turkish territory, is not true. As a matter of fact, the question of the port's responsibility is indispensible since the capture, payment of the ransom and liberation of the captives all occurred in Turkish territory.

The correspondence on the subject of the measures taken for the discovery and arrest of the brigands continues and the insufficiency of the efforts displayed by the Turkish authorities has been the subject of complaint by the United States legation.
